

# AWARENESS

Make your employees the strong link in your security chain

In the current digital era, information security has become a **major concern** in the life of businesses. Faced with increasingly sophisticated threats targeting the weakest link «the human» it becomes imperative to regularly raise awareness among all staff for the adoption of **daily cybersecurity practices**.

A simple approach to address the following challenges:

- What are the actions and reflexes that all users should have?
- How to foster a lasting change in mindset?

## OUR EDUCATIONAL SOLUTIONS

### E-LEARNING

A synchronous learning to continually raise awareness among a large audience

- Ideal for onboarding **new employees** into awareness programs and **covering the entire workforce**
- **BYCE: ou SaaS turnker cyber awareness solution**
  - > E-learning to raise user awareness of information security
  - > Turnkey solution with 8 awareness modules available
- **Tailor-made content:**
  - > In response to legal, regulatory or standards requirements, business, methodological or strategic needs, or identified and prioritised risks
  - > Optional SCORM Modules

### SESSIONS AWARENESS

To maintain human contact and develop a corporate vision

- **Face-to-face or distance learning**
- Educate the entire workforce on **specific topics** and explain their relevance within the company
  - > Examples: phishing, GDPR, security policy, protection of business secrets etc.
- Tailor sessions to **specific roles or departments for focused awareness:**
  - > Examples: FOVI (False Transfer Orders), secure development, integrating security into projects, contributing to risk management etc.

### COMMUNICATION MATERIALS

To complement awareness and training efforts

- Leaflets, computer graphics, communication messages designed to **reinforce awareness and training initiatives**
- Transmit a **clear, high-impact message** to all company employees

## OUR BENEFITS

**01** ■ Diversification of awareness channels for better absorption

**02** ■ Ensuring that all individuals are familiar with the challenges and responsibilities associated with cybersecurity

**03** ■ Fostering a collective commitment from all stakeholders in the organisation by improving their comprehension of cybersecurity expectations
