

CLOUD ROADMAP

Evaluate your Cloud eligibility and plan your migration

An analytical approach to meet the following challenges:

- What are the eligible perimeters of the IS, towards what type of Cloud solution?
- What modernization efforts must be made?
- What targets budgets are to be expected?
- Which transformation path to adopt?

OUR OFFER

FLASH AUDIT & MAPPING	TARGET MODELING	DEFINITION OF THE TRAJECTORY
<ul style="list-style-type: none"> → Qualification of the scope of the study and collection of the related documentation (architecture, infrastructure & contract). → Audit and macroscopic mapping of the IS according to the eligible perimeters. 	<ul style="list-style-type: none"> → Definition of evolution scenarios according to the perimeters of the IS (Public Cloud, Private Cloud, Hybrid Cloud). → Definition of target macroscopic architectures with advantages, disadvantages and efforts to be provided according to each scenario. 	<ul style="list-style-type: none"> → Definition of target budget envelopes (CAPEX and OPEX). → Framing of the transformation program (alloted provisional planning).

THE BENEFITS

- 01 ■ Efficiently obtain a mapping of your assets eligible for the Cloud.
- 02 ■ Have a transformation roadmap.
- 03 ■ Identify the costs of cloud transformation.

OUR VALUE PROPOSITION

Audit and mapping of the IT.

Modeling architectures and evolution scenarios.

Financial projection.

Definition of migration roadmap.
