Almond

CYBER SUPPORT DEDICATED TO SOFTWARE COMPANIES

Improve your overall security level & promote a trusted service

As a software company, cybersecurity is a strategic challenge to guarantee a good quality service to your customers.

A specific analysis approach to meet your business challenges:

→ How to demonstrate a good level of protection of the platform (Paas, SaaS, Iaas)?

→ What are the main IT risks for my business?

→ What secure actions should be prioritized to be effective?

→ How do I organize IT security in my company?

→ How do I prepare for a major IT incident?

OUR OFFER

CYBERSECURITY AUDIT

→ **Maturity audit, risk assessment, penetration testing, supplier evaluation.**

RESILIENCE

→ **Business Continuity Plan (BCP) or Disaster Recovery Plan (DRA).**

→ **Crisis Management, Reversibility Plan.**

ASSISTANCE

CERTIFICATION PROGRAM

→ **ISO27001, ISO 27701, HDS, health data hosting services, PCI-DSS, SWIFT, GDPR...**

DOCUMENTARY MANAGEMENT

→ **Security Policy, Contracts / SLA.**

→ **Security Assurance Plan (SAP).**

CUSTOMER TESTIMONIAL

Pierre- Charles Bertineau, CTO at Kiplin.

«With Almond, we benefit from a **high level of expertise** and we are very satisfied with the concrete contribution from the first step, which was the realization of the Information Security Policy. Indeed, we were increasingly audited by our customers who are essentially large customers, on the security aspects of our solution.»

OUR VALUE PROPOSITION

Support for multiple guidelines/standards and integrated management systems.

Automated approach and processes to your business due to our strong experience in BtoB, BtoC, BtoBtoC companies.
