

# FLASH MATURITY ASSESSMENT

Identify your overall security level and improve your practices

An approach that enables you to quickly reduce the main IT risks.

An analytical approach to meet the following challenges:

- What are the main IT risks to which my business is exposed?
- What actions should be taken to reduce the risks?
- How to organize IT security in my organization?
- Which internal and external actors can handle these actions?

## OUR OFFER

BEST SECURITY PRACTICES	ACTION PLAN	SECURITY LEVEL
<ul style="list-style-type: none"> <li>→ <b>Cyber security assessment</b> based on recognized standards (National Agency for Information Systems Security).</li> <li>→ <b>Identification of the main risks</b> based on the findings, for example:                             <ul style="list-style-type: none"> <li>&gt; Ransomware leading to a stop of the activity.</li> <li>&gt; Phishing enabling massive data extraction.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>→ Identification <b>of the organization's security improvement points.</b></li> <li>→ Identification of concrete <b>short and medium term actions</b> enabling the organization to reduce its IT risks.</li> <li>→ Identification of <b>internal and external actors</b> enabling the organization to <b>increase its security</b> skills in order to implement the action plan.</li> </ul>	<ul style="list-style-type: none"> <li>→ The identification of your <b>main risks</b> and an <b>action plan</b> will allow you to have a view on:                             <ul style="list-style-type: none"> <li>&gt; your current security level.</li> <li>&gt; in the short term.</li> <li>&gt; in the medium term.</li> </ul> </li> <li>→ We also propose to include in your security level referentials such as <b>ISO27001</b> or the <b>GDPR</b>.</li> </ul>
