

INFORMATION SECURITY

Pass your ISO 27001 certification, maintain it and improve your ISMS

A personalized approach to help you implement and improve your ISO27001 certified Information Security Management System.

An approach adapted to your business and your organization:

- By taking into account your strategic challenges and objectives.
- By assessing your existing security and governance.
- By defining the scope of the ISMS and the roadmap for compliance.
- By accompanying your teams in the management of the changes to be made.
- By accompanying you in the continuous improvement of information security.

OUR OFFER

BUILD YOUR ROADMAP

- Identify **your business, your challenges, your objectives and the needs of your stakeholders.**
- Identify the scope of your future ISMS.
- **Analyze the risks linked to your company's activities** in order to define the efficient measures to be planned to deal with them.
- **Analyze the gaps in your existing system** in relation to the standard.
- **Determine the compliance plan** with associated responsibilities and resources.

BUILD THE SMSI

- **Support your company and your teams** in the change management process.
- **Raise your teams' awareness** of the ISMS.
- **Lead the implementation of the compliance plan.**
- Define and implement the **monitoring and control of your ISMS.**
- **Strengthen your ISMS teams through our ISMS offers** : compliance of your document base, incident response, crisis simulation...

AND CONTINUOUSLY IMPROVE IT

- **Support your CISO and his teams** in their roles within the certified ISMS.
- **Audit the ISMS regularly:** governance, practices and controls.
- **Raise awareness among your teams** : by applying your program and/or using our BYCE product.
- **Maintain the training of your ISMS actors** through an adapted formula ranging from ISMS coaching to certification training.
