

# OFFENSIVE SECURITY

Secure your information system by using cybercriminals' methods to find flaws

**Our philosophy:** offer the most cutting-edge expertise in the field of hacking.

**Our motto:** **pragmatism.** Our Offensive Security team concretely measures the security level of a perimeter **using the same methods as real hackers.**

## OUR OFFERS

### 360° INTRUSION TESTS

- **Penetration tests performed manually:** internal and/or external tests, black/grey/white box, Red Team.
- **Wide-ranging areas of expertise:** complex business applications, websites, mobile applications (iOS or Android), AD (Active Directory) security or any component of your Information System.

### DEEP DIAGNOSIS

- **Technical audit** including security analysis of network/applicative architecture.
- **Security audit** of the source code of your applications.
- **Security analysis** of configurations (Cloud, servers, firewalls, databases, etc.).

### SUPPORT AND MONITORING

- **Precise and pragmatic action plan.**
- **Clear, detailed and educational report** with executive summary, in French or English, followed by an explanatory meeting.
- **Security training sessions** for your teams.

## THE BENEFITS

- 01** Analyze each important component of the architecture to get an in-depth and realistic diagnosis.
- 02** Be assisted by the best multi-certified hackers (OSCP, PASSI, CISSP, SANS...), who are passionate and experts in their field.
- 03** Obtain results with complete objectivity and the utmost ethic and confidentiality.
- 04** Have a precise action plan, understand the findings and be able to communicate them internally.

## OUR SCOPE OF INTERVENTION
