

# CRITICAL SERVICE OPERATOR

Achieving compliance

A **proven approach** to comply with the **Network and Information Security Directive (NIS)**.

An analytical approach and long-term support to meet the following challenges:

- How to secure your critical perimeter?
- How do you secure your critical perimeter?
- Which solutions are aligned with your needs and NIS security rules?
- How to maintain your level of compliance over time?

## OUR OFFER

### AT THE BEGINNING...

- Assistance in **appointing a correspondent** with the ANSSI.
- **Risk analysis** enabling to delimit your **Essential Information System** and declaration of the EIS.
- **Mapping of your EIS.**
- Implementation of a **process for handling alerts and reporting significant incidents** to the ANSSI.

### ...COMPLIANCE...

- Development of a **roadmap** including a **gap analysis on the 23 security rules, the application deadlines** and the **measures costs of implementation.**
- **Animation of the roadmap by a managed service offer** : update of your security policies and procedures, deployment of an awareness program, organization of the incident response, certification of your EIS, etc.

### ...AND MAINTENANCE

- Support for the operator's **NIS compliance over the first three years**, depending on the application deadlines.
- Taking into account **the evolution of the EIS.**
- **Maintenance of the compliance** on the perimeter from the third year.
- **Implementation of regular compliance checkpoints** and an associated dashboard.

## THE BENEFITS

**01** ■ Turn compliance into a lever for improving the ISS.

**02** ■ Achieving compliance objectives on time.

**03** ■ Optimize costs and avoid penalties.

## OUR VALUE PROPOSITION

 Detailed understanding of your critical systems.

 Cybersecurity service offering aligned with NIS requirements.

 Monitoring and maintaining compliance.
