Course overview

This training enables you to learn the Ebios RM methodology (Expression of needs and identification of security objectives), a method recognized by the ANSSI.

During this training, you will acquire by alternating theoretical and practical time, skills and abilities to carry out an Ebios RM study. You will develop a practical case study from start to finish, enabling you to understand all the ins and outs of risk management with Ebios RM.

01 ■

Understand the concepts, issues and basic principles of risk management when using the EBIOS Risk Manager method.

03 ■

Understand the conclusions of an EBIOS Risk Manager study and its main deliverables

02 ■

Understand the activities of the EBIOS Risk Manager method **in order to follow the realization of risk analysis as a project manager**

04 ■

Pass a certification exam to **validate the knowledge** acquired during the training and become "PECB EBIOS Risk Manager" certified

Useful informations

Who should attend?

- People wishing to learn the fundamental concepts of risk management
- People involved in risk assessment activities using the EBIOS method
- People wishing to understand risk assessment techniques based on the EBIOS method
- People wishing to master techniques for analyzing and communicating risk assessment results based on the EBIOS method
- Security officers
- Risk managers
- Company data processing managers
- Project managers or consultants
- CIOs and managers responsible for corporate IT and risk management.
- Information security team members
- Expert IT consultants
- Technical experts wishing to prepare for a position in information security, CISO

Method of assessment

The "PECB Certified EBIOS Risk Manager" exam is held on the 3rd day of training and lasts 3 hours. The exam covers the following areas of competence:

- Domain 1: Fundamental principles and concepts of information security risk management according to the EBIOS method
- Domain 2: EBIOS-based information security risk management program
- Domain 3 : Information security risk assessment based on the EBIOS method

Entry requirements

- Knowledge of risk management and its fundamentals.
- First knowledge of EBIOS 2010 or EBIOS Risk Manager methodology.

How and when to access

The participant is considered registered when:

- The prerequisites and needs are identified and validates
- The training agreement is signed

Registration requests can be sent up to 10 working days before the start of the training.

To go further

This training course is a preparation for the following training course:

- ISO 27005 Risk Manager Certification

Accessibility

Whether you are recognized as having a disability or not, making our training accessible to everyone is part of our commitment. If you need compensation or adaptation for the content, the supports, the "venue", the material used, the schedules, the rhythm, **we are at your disposal.**

Face-to-face training

Course curriculum

Day 1	Day 2	Day 3
<ul style="list-style-type: none">→ Course objectives and structure→ Introduction to the EBIOS method→ Workshop 1: Framework and security foundation→ Workshop 2: Sources of risk→ Workshop 3: Strategic scenarios (Part 1)	<ul style="list-style-type: none">→ Workshop 3: Strategic scenarios (part 2)→ Workshop 4: Operational scenarios→ Workshop 5: Risk management→ Certification process and end of training	<ul style="list-style-type: none">→ Review→ Certification exam

Training benefits

This training is based on alternating theoretical and practical sessions:

- Lectures illustrated with examples from real cases
- Classroom exercises to help prepare for the exam

In order to preserve the good realization of the practical exercises, the number of participants in the training is limited.

Prices and informations

- **Duration:** 3 days (21 hours)
- **Meal:** breakfast and lunch included
- **Price:** 2300€ excl. tax.
- **Financing:** OPCO support
